

Initial Measurements Guidelines		Checks									
View	Measurements Needed	Elevation A	Elevation B	Elevation C	Elevation D	Elevation E	Elevation F	Elevation G	Elevation H	Elevation I	Elevation J
1. Kitchen top view should contains											
A. All the walls (Kitchen & if any balcony attached to it)	Width of walls										
B. Beam	Width & Depth										
C. Coloumn	Width & Depth										
D. Window	Width,Height,Wall below window bottom height from FFL,Wall above window, wall dimension in left &										
E. Door	Width,Height & Wall above doors & wall dimension from the nearest adjacent elevation										
2. Elevation View should contains											
A. Coloumn	Height & width for front view, Depth & height in section view										
B. Beam	Height & width for front view, Depth & height in section view										
C. Window	Width,Height,Wall below window bottom height from FFL,Wall above window, wall dimension in left & right of window										
D. Door	Width,Height & Wall above doors										
E. Sunk Drop	Drop, Width										
F. Ceiling height	Ceiling height measurements at 2 to 3 places below Ceiling & Sunk Drop										
G. Electrical Point	Height from FFL, Distance from nearest elevation wall										
H. Plumbing Points	Height from FFL, Distance from nearest elevation wall										
I. Platform	Height & Width										
J. Depression	Height,width & Depth										
K. Projection	Height,width & Projection										
L. Pre-installed countertop	Depth, height & thickness of countertop										
M. Concrete Skirting	Depth, height & thickness of countertop										
N. Gas Pipeline entry point	Height from floor & distance from the nearest wall										
3. Ceiling Measurements											
A. Fire Alarm Point	Length from atleast two elevation										
B. Electrical point	Length from atleast two elevation										
C. water sprinkel points	Length from atleast two elevation										
D. False Ceiling	Width & drop										

Note: 1. Check Whether all walls is solid or its of gypsum or ply wall.

2. Ask client/customer for electrical & plumbing layout of kitchen (for walls, floor & ceiling).
